FIBRE BROADBAND

CONNECTING BUSINESS TO
SUPERFAST RELIABLE BROADBAND

SUPERFAST, RELIABLE

Slow and unreliable broadband is frustrating and wastes time, and the more your business depends on transferring data the bigger the issue. On average three hours a week is wasted by each employee because of slow speeds. It's obvious that finding a solution will save your business time and money, but the solution needs to be affordable.

CSE Zycomm Fibre Broadband provides upload and download speeds at up to four times faster than other high profile national fibre providers with no variation in service at any time day or night. CSE Zycomm Fibre Broadband enables you to stream, share and access online content faster and simultaneously across multiple devices. Looking to the future, your connection will be equipped to handle any increase in smart technology your business demands.

WHY IS OUR FIBRE BROADBAND DIFFERENT?

Most fibre broadband solutions will use a shared fibre line to provide your business with broadband, which means that, although the line can provide up to 1Gb bandwidth for uploading and downloading, in reality your download speed may be compromised by other users on the same line.

Many businesses need fast upload speeds as well as fast download speeds to operate cloud based software quickly and reliably or upload large files rapidly and efficiently.

CSE Zycomm Fibre Broadband offers your business a dedicated uncontended* fibre leased line, providing up to 1Gb (1000Mbps) bandwidth and giving symmetrical (equal) upload and download speeds.

*Uncontended = No peak time slowdowns, no limitations - dedicated to your business and guaranteed speed 24/7

THE FUTURE OF COMMUNICATION

WHY CHOOSE CSE ZYCOMM?

CSE Zycomm is an independent fibre provider, with over 15 years' experience of delivering broadband services in areas where conventional broadband speeds have been very poor or unavailable. We have a more flexible approach than most other fibre network providers in terms of size of the development or commercial property and geographic location. We are happy to deploy in sites that are not in central locations and to smaller business units and developments.

We can provide full fibre from our local data centres, ensuring dedicated bandwidth and guaranteeing upload and download speeds.

FLEXIBLE BROADBAND PACKAGES

CSE Zycomm can offer you a competitively priced fibre leased line package, tailored to your business' budget and internet service needs.

LOCAL SERVICE & SUPPORT

At CSE Zycomm we understand that service is key to supporting our customers effectively. We have a local dedicated service and support team with the expertise and ability to offer you a level of service and support unmatched by the national fibre providers.

HOW CAN WE HELP?
